HOW TO MAKE LUKA SP SOUND LESS MIKU-ISH

What you need:
PIAPRO STUDIO (pirated or not)
LUKA SP (pirated or not)
LUKA V4X OR V2 (pirated or not)

FIRST STEP

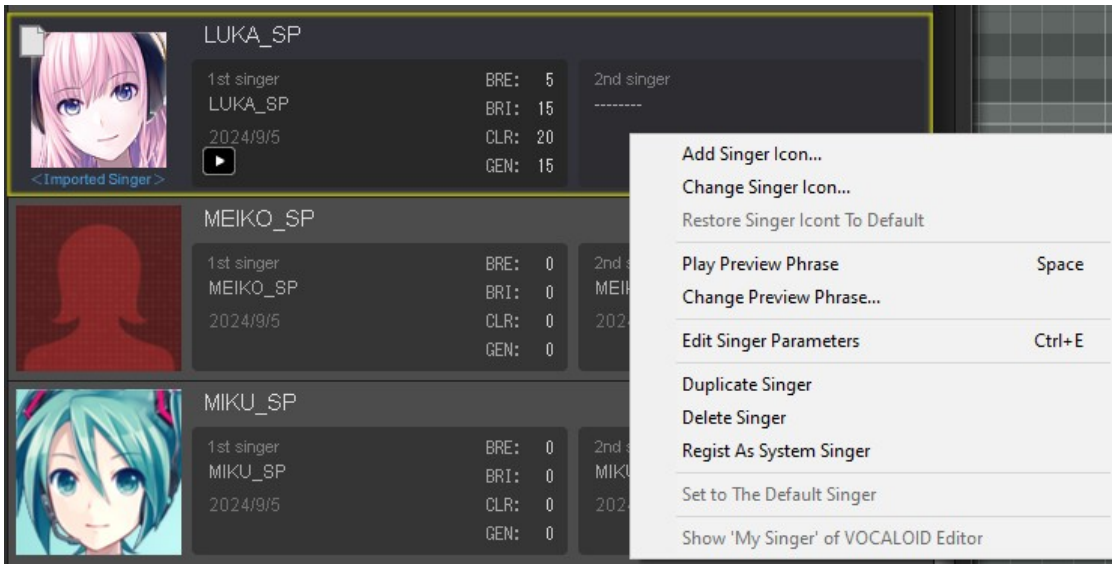
Open PIAPRO studio and go to singer list

SECOND STEP

Click on the button next to the search bar

THIRD STEP

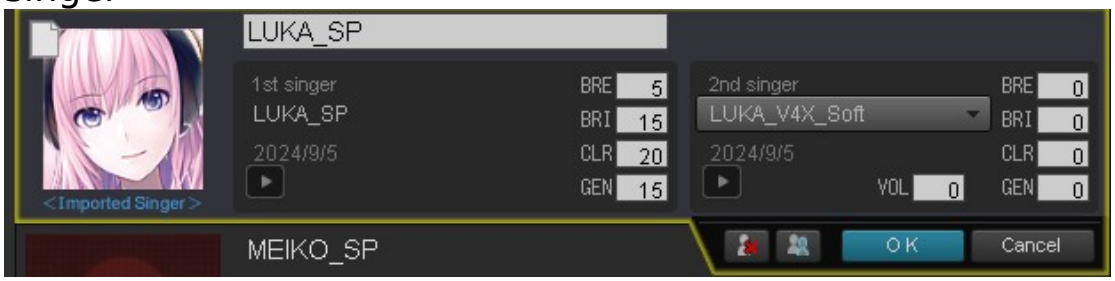
Right click on LUKA SP and click “Edit Singer Parameters”



FOURTH

STEP

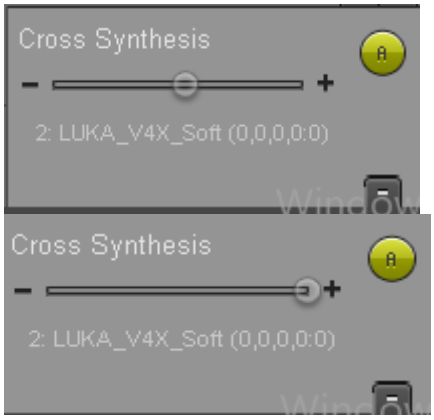
Put any LUKA voice bank besides SP as 2nd singer



FIFTH STEP

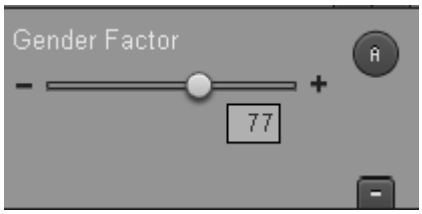
Now that we have done that. Go to the Cross Synthesis Parameter (a.k.a XSY) And change the parameters however you like!

NOTE: the higher the slider the more she sounds like LUKA



OPTIONAL

STEP

If you think LUKA SP sounds a bit childish you can use gender slider to fix that!


(I personally use 77)
